Yedoo Ltd

2011 From http://www.yedoo.eu/YEDOO_Complete_Catalogue_2011_WEB.pdf

Authentic Czech brand of scooters, training bikes and children bikes with original design, high quality, and bright colours.

Gruppo Sportivo AVIS Ivrea - Sport e Solidarietà

We have put the last almost 13 years into our products. Every day, we think about what else could be improved in order to better satisfy the ideas and demands of our customers.

Most innovations require a lot of work but don't effect the price of the products.. However quality components contribute to higher production costs. To be able to innovate and not to raise the prices, we saw the solution in introducing the second line of products.

Yedoo Superior (yellow line) stands for superior quality, while Yedoo Basic (blue line) represents the price. Both Superior and Basic collections maintain an excellent ratio of quality and price. So the selection is plentiful!

We can encounter all kind of people using our products: friends riding scooters for fun; a grandfather helping his grandson to use a running bike; parents watching over their children while using their scooters in the park. We cherish the idea that our products bring people closer and it provides us with a lot of new inspiration.

We have a crew of superb technicians, designers and graphic designers. Behind our products, there is a team of people that enjoy their job and I strongly hope you will be able to feel it.

Thank you for your work and your confidence in our products.
On behalf of YEDOO team

Dan Pilát
